

BIRAJ DE

COMPUTER SCIENTIST AND COMPUTER PROGRAMMER

I have more than 2 years of experience on Programming, Started developing my skills on Image Processing and Image recognition. I have built a project using Deep Learning and CNN's , and Interested in the field of Data Science. I also have skills on Web Designing.

SKILLS

PROJECTS

Image Classification using CNN , Deep Learning

For this project I have used a data set taken from Kaggle which has 100 different classes of images. My model achieved 75% accuracy overall in detecting an image. The link to the blog on this project is [here](#) . The blog hosted on medium is added to jovian.ml publication

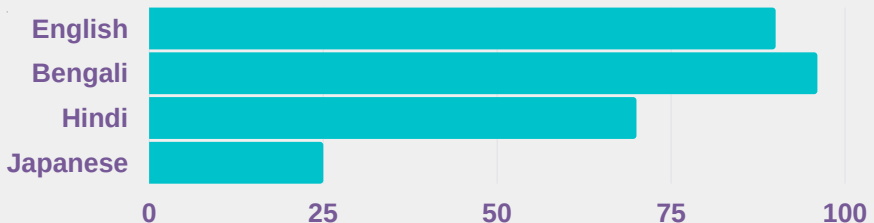

Google's Dragon Jump Game using Java Script

Made Google's Dragon Jump Game using Javascript, CSS and HTML. Also made a little modification so that the game can run automatically without any user input(bot mode). This game has scoring system using browsers internal storage. Play the game [here](#) .

COURSES AND CERTIFICATIONS

- Python for everybody Specialization, Michigan University
- Deep Learning with Pytorch (from Zero to GAN's), Jovian.ml
- Web Design for Everybody Specialization , Michigan University
- Better Spoken English, NPTEL (IIT Madras)
- Python and Problem Solving Certification from Hackerrank
